## **ETEC 110 Energy Master Planning for Commercial Facilities 2 Units**

Students will learn and apply methods of energy master planning for commercial and institutional facilities for increased user comfort, lower operating costs, and climate resiliency. They will learn how to develop metrics in support of energy master planning and design investments. Integration of renewable energy and high performance solutions will be covered as well as related subject areas of efficient water use and waste reduction strategies. Students will receive training in performing energy master planning audits for facilities and prepare an energy systems retrofit proposal.

## **ETEC 116 Introduction to Computer Integrated Manufacturing 3 Units**

Students will receive theory, practical knowledge, skills, and abilities that will readily apply to automation technology. They will gain skills in automation control including sensors, actuators, programmable logic controllers (PLCs), industrial robotics, and computerized numerical control (CNC) technology.

## **ETEC 150 Commercial Wiring and Lighting Facilities 4 Units**

Students are introduced to commercial and industrial wiring, including conduit bending, wire fill, load calculations, raceways, LED lighting, high pressure sodium lighting, metal halide and fluorescent lighting. The students will be bending conduit, pull wires and learn how to wire commercial and industrial lighting circuits.proposal.

## **ETEC 151 Motor Controls Facilities 5 Units**

Students will acquire knowledge and skills working with various types of motor controls used in a commercial or industrial facility. They will wire multiple commercial projects using ladder and schematic diagrams, including timer circuits, motion sensors, photo cells, pilot duty relays, safety and overload controls.
